Betrifft/Subject: DYNAMIC Glass Fiber Performance propeller series

Dear customer,

Unfortunately, an error occurred during the production of these propellers.

The imprint "electric propeller" was mistakenly applied to the propeller and the packaging for the electric version of the propellers was also mistakenly used.

However, these are like propellers for combustion engines!

As the packaging is only protective packaging for sale anyway and will therefore be disposed of later, the only disturbing feature is the imprint on the propeller.

To avoid confusion later, we recommend taping this incorrect lettering neatly to the edge and removing it with nitro thinner or similar.

We apologize for the inconvenience. Robbe Modellsport
